

2016 – 2019 Legislative Accomplishments

2016

MACCP focused on pushing back on funding for universal preschool/voluntary PreK and opposing the family child care union election, which failed 1014 to 392.

2017

HHS Omnibus – Changing the annual training requirements so they are due during a provider's licensing year instead of within the same month it was last taken. MACCP had requested this for all trainings, not only annual ones.

2018

SF2683 - Modifying background study provisions to repeal the fingerprinting of a providers' minor children, unless they have lived outside of MN in the last 5 years.

SF3310 - Eliminating the requirement for family child care providers to give parents/guardians an annual notice of liability insurance.

2019

SF 1030/HF 1801 – Starting the process to codify Rule 2 (9502) into statute.

SF 887 – Exempting emergency substitutes from training requirements.

SF 1034/HF 1685 – Increasing the time allowed to use a substitute to 500 hours.

SF 886/HF 2047 – Requiring a county licensor to seek clarification from DHS when the licensor and provider have a dispute over the interpretation of a licensing requirement.

SF 882/HF 1926 – Clarifying that family members do NOT need training to take care of their own/related children during daycare hours, including in unlicensed areas indoors or outside. It also exempts individuals who have no unsupervised contact with daycare children from a background study, except for household members.

SF 980/HF 2049 – Prohibiting counties from requiring current licensed providers who move into the county to go through additional classes or orientations meant for NEW providers.

HHS Omnibus - Streamlining and eliminating unnecessary paperwork by allowing forms to be transmitted and stored electronically.

SF 978/HF 1925 – Removing the ability to issue a correction order not discussed during the exit interview, unless the provider chooses to not participate in the exit interview.

SF982/HF 1924 – Removing the requirement to give a copy of the Emergency Plan to families in care or posting in a prominent location.

This list does not include the many harmful policies and proposed legislation that MACCP has successfully advocated against over the last four years.

**MACCP IS THANKFUL TO THE LEGISLATORS AND PROVIDERS
WHO HAVE SUPPORTED OUR EFFORTS.**
